Board Election Committee 2024

National Drug and Alcohol Screening Association

To our valued committee members:

Please accept my application package to sit for election in the 2024 process. I look forward to the continued success of the organization and would like to participate, once again, as a board member.

I have a long history in working with boards and commissions in furthering the wellness of the workplace and community environments. As a past Certified Occupational Safety Specialist, I have served workplace environments in a safety capacity. The COSS is charged with knowing the safety regulations and also providing education for employers and employees around those regulations.

As one of the nation's 4800 National Board Certified Health and Wellness coaches, I am proud to support numerous individuals in their business, physical and mental challenges to achieve solid outcomes. This work is my love language and allows me to help folks dig deep to discover what they really desire and uncover ways to achieve the goal.

As a Certified Crime and Trauma Decontamination Specialist, I see the aftermath of mental health and substance misuse issues. Without fail, every one of my cases has been related to those two problems. I am willing to never have to use this skill again if we can save the lives of Americans and have zero suicides.

My company participates in food banks, homelessness issues and supports numerous youth events in the communities that we serve. We believe at our core that our mission is to TAKE CARE OF PEOPLE. Our mission statement reads: "We offer world class education and screening services for workplace and community safety." And we live it daily.

Why does that matter for this application? Because this organization is not about drug screening. It's about ensuring that people are free from harm. That kids go to school drug free. That parents are able to work in environments that they feel safe in. That our elders sleep well, without worry of break ins. NDASA is about people. That's where we align. I'm a leader, listener, teacher and student. I like a hard line, but am willing to find the middle, when needed.

I would be honored to represent NDASA in another term, if this committee will accept and approve my application.

Sincerely,

Renee Schofield, CEO
